

FOR IMMEDIATE RELEASE:

DoverPhila Credit Union Completes CAMS-ii Core Processing Solution Implementation

Powell, Ohio-August 11, 2015- DoverPhila Credit Union has completed their implementation of the CAMS-ii Core Processing Solution from R. C. Olmstead, Inc. (RCO) of Powell, Ohio. RCO will provide core processing services to the \$404 million, 35,541 member Credit Union as well as a complete member facing package.

Jack Dooling, CEO of DoverPhila Credit Union, states, “We wanted to add new features to our member offerings. Having worked with RCO for over 30 years as our core provider, when they showed us CAMS-ii, we knew the product was right for our needs and we could trust RCO to provide the training and service to back it up.”

As well as core processing, DoverPhila Credit Union will be utilizing other CAMS-ii features including: Home Banking, mobile applications, loan document signatures from home, e-alerts, real-time ATM/Debit card processing and electronic document viewing for the member’s convenience.

“Our staff and RCO worked hard together to make sure everyone here was prepared for the changes. Conversion is complex, but the training and expectations put us in a position to easily manage the situation,” continued Dooling.

About DoverPhila Credit Union

Founded in 1953 in Dover, Ohio as Warner & Swasey Employees Credit Union and later becoming Gradall Employees Credit Union before expanding their field of membership to become DoverPhila Credit Union. The philosophy has always been “people helping people”. Continually practicing that standard of doing business while offering a full service financial organization has fueled their growth to over \$400 million in assets and serving more than 35,000 members from 5 locations with 85 employees.
